

**(REF:US09) TRANSPORTATION DISCRETE CHOICE MODELER /
ECONOMETRICIAN**

BOSTON OR NEW YORK

Steer Davies Gleave is an employee-owned international transportation consulting firm. We advise clients in the public and private sectors on policy and regulatory issues, infrastructure investments, service design, and planning or business strategy. Our work frequently involves the development and application of state-of-the-art techniques in travel demand modeling and forecasting.

Steer Davies Gleave is seeking to fill an opening in its Boston or New York office for an intermediate level transportation discrete choice modeler or econometrician. Candidates for this position should be highly motivated with a good knowledge of discrete choice modeling theory and practice, familiarity with classical and contemporary econometrics, considerable proficiency working with data and software, and a particular interest in transportation.

Candidates might have a recent graduate degree from a transportation or economics program providing in-depth training in discrete choice modeling and econometrics, and/or several years of prior transportation planning work experience with exposure to these topics.

Intermediate level analysts at Steer Davies Gleave should be able to learn quickly; to apply their knowledge to solve problems involving new situations; to manage their time and prioritize tasks; and to communicate well with peers, senior staff and clients. They work closely with more senior personnel on small teams and are expected to perform challenging work and quickly assume increasing levels of responsibility.

Steer Davies Gleave is an equal opportunity employer.
